

AlphaSize® Liquid-Science Platform

Expanding cognitive health beyond the capsule.

For more than 25 years, AlphaSize® has helped brands deliver trusted cognitive support through clinically studied Alpha-GPC. Yet despite growing consumer interest in convenient formats, bringing Alpha-GPC into liquids and other novel delivery systems has historically been challenging. Stability, compatibility, and manufacturing limitations often confined cognitive products to traditional capsules and powders.

In 2025, CHEMI Nutra introduced the AlphaSize® Liquid-Science Platform and expanded U.S. manufacturing access, creating new opportunities for formulators. Built around AlphaSize® Liquid 85L, the platform enables seamless integration into softgels, ready-to-drink beverages, shots, drops, gummies, and other emerging formats while maintaining the quality, regulatory confidence, and scientific heritage that have defined AlphaSize® for decades.

This advancement reflects a broader shift occurring within cognitive health. Consumers increasingly expect support that fits naturally into everyday life, and brands are seeking delivery systems that improve convenience, compliance, and sensory experience without sacrificing efficacy. By overcoming historical formulation barriers, AlphaSize® allows cognitive ingredients to move beyond the capsule and into formats that better align with modern consumer preferences.

Importantly, this innovation was not about changing the science behind AlphaSize®. It was about making that science easier to access and easier to formulate. Expanded U.S. manufacturing capabilities provide shorter development timelines, improved supply continuity, and enhanced technical support while complementing CHEMI's longstanding pharmaceutical manufacturing expertise.

Some breakthroughs reinvent ingredients. **This one simply makes 25 years of trusted science easier to build with.**

AlphaSize® Liquid-Science Platform

- Expanded U.S. manufacturing access
- Powered by AlphaSize® Liquid 85L
- Enables softgels, RTDs, shots, drops and gummies
- Preserves quality and regulatory confidence
- Makes cognitive support accessible in modern formats
- Builds on 25 years of AlphaSize® scientific heritage
